Dear de Tiera,

Thank you for your email and the proposal for the follow-up study on fruit flies on mango plants in Spain. I am very interested in this project and would be happy to discuss it in one of my lectures.

I will also be happy to meet with you to discuss the project in more detail. Please let me know if you are interested in meeting.

Thank you again for your interest in this important research area.

Sincerely,

Jochen Kruppa-Scheetz

Dear Professor Jochen Kruppa-Scheetz,

We hope this email finds you well.

We at Tanga Mango were very impressed with your previous work on the analysis on fruit flies on mango plants in Spain. Your findings were incredibly valuable to us, and we have used them to improve our growing practices and enhance the quality of our mangoes.

However, given the evolving climate and changing conditions in our Spanish orchards, we believe a follow-up study would be beneficial. We think a new study could help us understand the latest trends in fruit fly behavior and adapt our strategies accordingly.

We would love to collaborate with you to design and conduct a new study focusing on:

- The impact of climate change on fruit fly behavior on mango plants in Spain.
- The effectiveness of new pest control methods in managing fruit fly infestations.
- The long-term potential of biological pest control methods for fruit fly management.

We are confident that your expertise and experience in this area would be invaluable for a successful study.

We have attached a proposal for the follow-up study for your review. We are open to your feedback and suggestions.

Thank you for your time and consideration. We look forward to hearing from you soon.

Sincerely,

Tanga Mango
